Problem Statement:

It is too hard to find a roommate for the college you attend/ plan on attending.

// Our users are aggravated because the USC roommate finder is difficult to access and to keep up with. Our solution should provide an easy way to find roommates that are compatible with them. // (thoughts?)

Ideas:

The usc roommate finder is too hard to access/ keep up with and you may miss out on potential roommate matches.

Most other colleges do not have a dedicated platform to find roommates, leaving you to use social media which is not ideal for finding a roommate.

Could also make a roommate finder for off-campus apartments if wanted.

Who is experiencing the problem?

High school seniors, college students, people that just graduated college who need a roommate.

What is the problem?

The problem is that people do not have a dedicated roommate finder app to have the sole purpose of finding roommates.

Where does the problem present itself?

The problem is presented when people start looking for roommates for college/apartment.

Why does it matter?

It matters because having a roommate you “match” with makes or breaks a good college experience or apartment lease.
